

# Python for Automation

Learn Python to extract data from websites. Along the way, you'll learn how to write loops so that your web scraping code can process a large number of pages.

Group classes in NYC and onsite training is available for this course. For more information, email [hello@nobledesktop.com](mailto:hello@nobledesktop.com) or visit: <https://mimi.programwithus.com/courses/python-automation-nyc>

## Course Outline

### Section 1

#### Introduction to HTML/CSS (Online)

- How a website is served
- Anatomy of a web page
- HTML tags
- IDs
- CSS classes

#### Python Part 1

- Integers + Floats
- Variables
- Strings
- Methods + Functions

### Section 2

#### Webscraping Exercise Part 1

- Introduction to using packages
- Requests packages
- Performing a GET request
- String manipulation
- Debugging a Python script

#### Python Part 2

- Booleans
- Conditional Statements
- Lists

- Indexing into strings + lists
- Looping over lists

## **Section 3**

### **Webscraping Exercises Part 2**

- Beautiful Soup package
- Honing in on data
- Common webscraping pitfalls
- Using loops in webscraping

### **Storage and Scheduling**

- Text files
- CSVs
- Scheduling a Python Script
