## **Python for Data Science Masterclass**

Learn beginner and advanced Python programming skills for data science in this hands-on masterclass.

Group classes in NYC and onsite training is available for this course. For more information, email <a href="mailto:corporate@nobledesktop.com">corporate@nobledesktop.com</a> or visit: <a href="https://www.programwithus.com/classes/python-data-science-masterclass">https://www.programwithus.com/classes/python-data-science-masterclass</a>

## **Course Outline**

This package includes these courses

- Python for Data Science Immersive (30 Hours)
- · Advanced Python for Data Science Bootcamp (30 Hours)

## **Python for Data Science Immersive**

- · Handle different types of data, such as integers, floats, and strings
- · Control the flow of your programs with conditional statements, loops, and functions
- · Reuse and simplify code with object-oriented programming
- Analyze tabular data with Numpy and Pandas
- · Create graphs and visualizations with Matplotlib
- · Make predictions with linear regression, using scikit-learn

## **Advanced Python for Data Science Bootcamp**

- Learn advanced Python programming and data science techniques & tools
- Work with advanced functions like map() and filter()
- · Integrate nested loops & global variables into your coding
- Use Juypter Notebook's interactive UI elements & integrate SQL
- · Perform linear & polynomial regression analysis
- · Create visualizations to display data efficiently
- · Extract data from online sources with web scraping
